In the PADI Open Water Diver course, your PADI Instructor takes you through the basics of learning how to scuba dive. You start in a pool and progress to the open water, getting the background knowledge along the way.

Your PADI Open Water Diver Course:

There are 3 main elements to the Open Water Dive Course. You'll do some pre-work in advance, attend a set of weekend sessions and pool time, and then finally, you'll do some open water dives with the awesome team of Float N' Flag Instructors.

1. Knowledge Development – This develops your familiarity with basic principles and procedures. You learn things like how pressure affects your body, how to choose the best gear and what to consider when planning dives. This is done via an interactive e-Learning module.
2. Confined Water Dives - You will develop basic scuba skills in the pool, learning how to set up your gear, easily get water out of your mask and practice some emergency skills.
3. Open Water Dives - After your confined water dives, you will complete four open water dives with your PADI Instructor at a dive site (or for some you'll do these in warmer waters down south). Either way, this is your chance to demonstrate your new skills in the open water!
