

NITROX DIVER

NITROX via PADI E-learning

PADI ENRICHED AIR (NITROX) DIVER

Welcome to one of PADI's most popular specialties – the PADI Enriched Air Diver course. Diving with enriched air nitrox lets you safely extend your no stop time beyond the no decompression limits for air. Diving with enriched air means more time underwater – but you need to be certified as an Enriched Air Diver to get enriched air fills.

Whether you're into underwater photography or wreck diving, on vacation in some tropical paradise, or just out for a leisurely day of diving at your local dive site, the PADI Enriched Air Diver course helps you get more out of diving by giving you more time underwater.

Prerequisite: Must be a PADI Open Water Diver (or qualifying certification from another organization).

What you'll learn:

- Learn to analyze cylinder contents.
- Plan enriched air dives.
- Safely increase your no stop time.
- This certification counts toward your Master Scuba Diver rating.

Schedule:

This course is easiest to complete online via PADI e-learning, as you'll work at your pace in the comfort of your own home. You'll complete the theory portion online, and then come into the shop for your "Practical" session. There are no training dives required for certification.

Registration:

Pay online or in-store (\$208 + tx) and we'll simply assign you a code and send you an e-mail to get started.

NOTE: The PADI minimum age requirement is 12.
