EMERGENCY OXYGEN PROVIDER

Feb 16th | Mar 30th | May 18th | Jun 10th | Aug 5th | Oct 5th

Be the one ready to help a fellow diver, should the need arise, by becoming a PADI Emergency Oxygen Provider.

The Fun Part

Breathe easy – knowing that you know how to recognize illnesses treatable by emergency oxygen. Being the best buddy you can be means being prepared – especially in a time of need

What You Learn

You learn how to:

- Recognize diving illnesses treatable by emergency oxygen
- Properly setup equipment
- Administer emergency oxygen

The Learning Materials You Need

The PADI Emergency Oxygen Provider Manual is an important component of PADI's Emergency Oxygen training program. Before the class, you'll review a step-by-step explanation of when and how to provide emergency oxygen. You'll also learn about safety considerations, and how to assemble and disassemble emergency oxygen equipment. The care-at-a-glance card is a quick reference guide to pack in your gear bag and review in case of an emergency. The Float N' Flag Instructor will provide all the necessary equipment and supplies for the course.

Prerequisites

Though suited for divers, this course has no prerequisites and doesn't include dives, which means it is equally applicable to those who are around divers – boat crew, non-diving buddies, lifeguards and diver support staff. You don't need any previous CPR or first aid training to take the course.

Cost: Course \$150 + Emergency O2 Provider Specialty Crew Pack @ \$75

Schedule:

Session #1 @ 6:00pm: Float N' Flag Dive Centre
