July 2nd, 3rd, 6th & 7th | Sept 17th, 18th, 21st & 22nd

Challenging and rewarding best describes the PADI Rescue Diver course, and every recreational diver should take it. This course will expand your knowledge and experience level. Rescue Divers learn to look beyond themselves and consider the safety and well being of other divers. Although this course is challenging, it is a rewarding way to build your confidence. Rescue Diver training will prepare you to prevent problems and, if necessary, manage dive emergencies. Many divers say this is the best course they've ever taken. Plus, earning your Rescue Diver certification gives you the opportunity to volunteer for the scenario day for future courses, where your fun and learning will continue. You'll cover the following areas in the course:

- Self-rescue and diver stress
- Emergency management and equipment
- Panicked diver response
- In-water rescue breathing protocols
- Egress (exits)
- Dive accident scenarios
- Minimum Age: 15 years old (12 for PADI Junior Rescue Diver)
